

BR 13 500

PRO 16 K

PRO 16 K BASC

BR13 is a log splitter capable of splitting lengths up to 55cm and has an adjustable table. It is ideal for preparing wood for stoves, fireplaces or boilers. Thanks to the double speed and 13 tons of splitting power it is an efficient, productive and very robust tool.

Pro 16K is a shorter length version of our popular PRO-LINE Vertical log splitters. Built to last they feature a non-deformable beam and have a tank separate from the structure. Fast and powerful, ideal for working with large and heavy logs. They come with double speed and are available in a 16-ton version.
