

S 13

S 13

S-line is Balfor's range of high-performance professional log splitters. Thanks to their top-quality components, high power and speed, the log splitters in this series offer unbeatable value for money. With their construction on a non-deformable beam, separate tank, side log loader (on tractor versions) and inclined DOMEX® wedge, they are the ideal tool for professionals. The CA versions have a log pulling winch as standard, which can pull logs weighing up to 1 tonne. The 13-metre cable winch has an automatic unwinder for fast, one-man operation.
