

TF HD RANGE

The TF HD auger is applicable to Skid Loaders and Wheel Loaders with SAE J2513 universal front attachment. It is suitable for those uses in which a high radial load is applied to the gearbox, for example the handling of large logs with the conical screw or horizontal drilling with large diameter drills. The Heavy Duty support designed and built by QM relieves the gearbox from any load, discharging the forces on the body of the auger. The double pin coupling, designed by QM and covered by a "patent", allows the auger to be used in heavy work in "locked" mode with QM tools such as wood splitter, log chopper etc. The wide range of accessories available make the auger versatile in the most diverse sectors such as construction, green maintenance, agriculture etc.

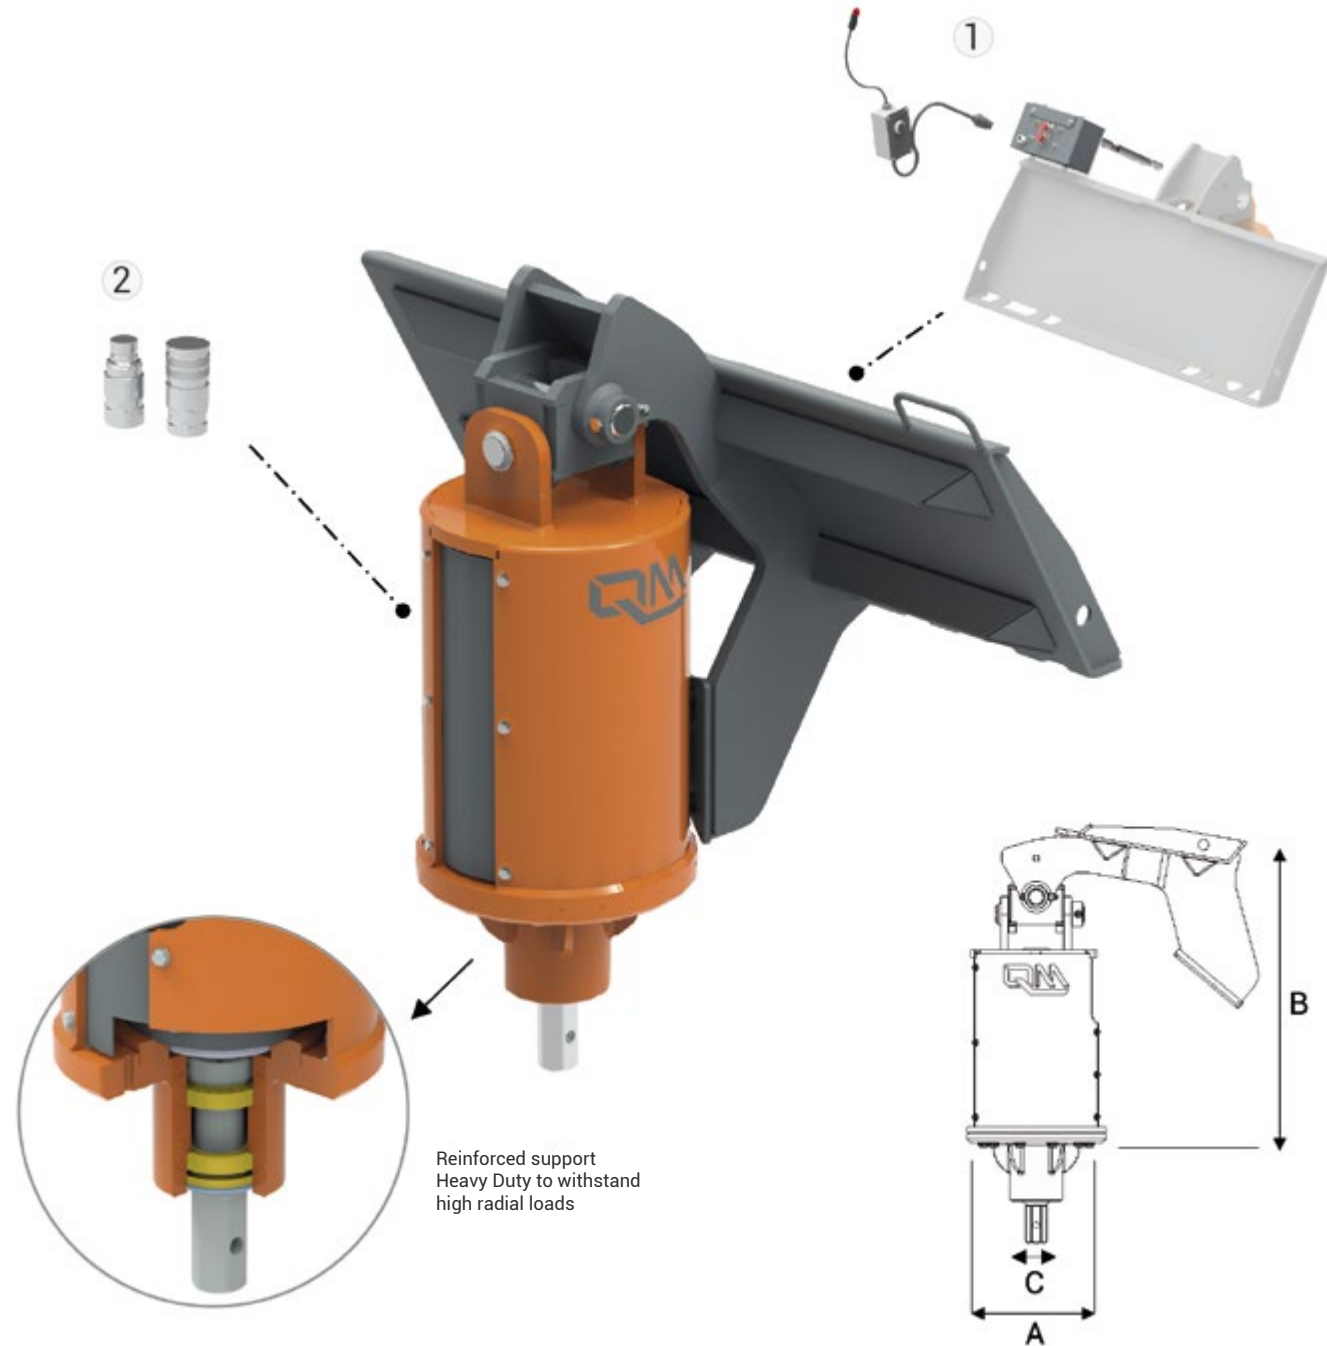

STANDARD TECHNICAL FEATURES

- Ultra compact and robust body that contains all the components inside.
- Heavu Duty gearmotor / tools interface support resistant to high radial loads
- Front and rear opening to easily reach the internal components for better maintenance
- Front and rear protective casings
- Planetary gearmotor for high performance even at low hydraulic flow rates
- Hexagonal drive shaft for quick tool change
- Shockproof valve as standard
- Hydraulic pipes L = 2000

STUMP PLANER TC

The stump planer is a useful tool for shredding the stump rooted in the ground. Thanks to the screws mounted on the blade supports, it is possible to adjust the milling depth according to the type of wood. The centering pin in hardened steel is interchangeable. Available with hexagonal fitting CH50mm or CH70mm. This tool employs significant radial forces and loads, therefore, its use is recommended with our TL HD auger capable of supporting such loads thanks to the Heavy Duty support.

TOOLS

WOOD SPLITTER SC

The wood splitter allows the breaking of wooden logs by screwing of the conical body. Available in several sizes, it suits operators needs at different levels from DIY to professional. All models are provided of an interchangeable hardened steel pilot bit. This tool employs significant radial forces and loads, therefore, its use is recommended with our TL HD auger capable of supporting such loads thanks to the Heavy Duty support.

TOOLS

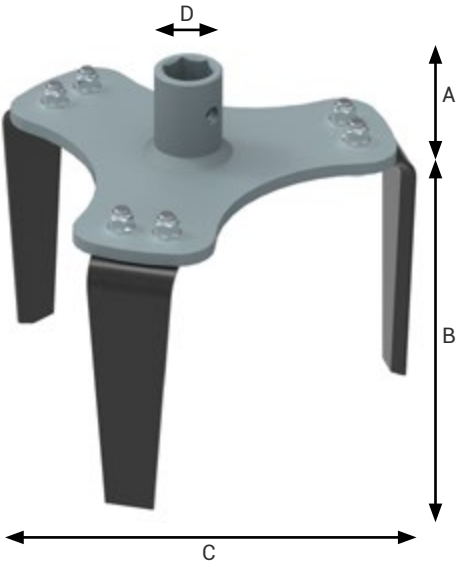

ROTARY HARROW ER

It is used to refine and work the soil by controlling the weeds. It meets the use in gardens, vegetable gardens, vineyards, orchards, and other crops. This tool employs significant radial forces and loads, therefore, its use is recommended with our TL HD auger capable of supporting such loads thanks to the Heavy Duty support.
